FOR IMMEDIATE RELEASE:

April 3, 2002

Hooplah Rebar Workshop Comes to South Seattle Community College Garden Center

Are you fresh out of new ideas for your garden? The Garden Center at South Seattle Community College (SSCC) has a spring seminar that might plant some seeds of imagination.

On May 11, the SSCC Garden Center's "Hooplah Rebar Garden Supports" workshop will teach interested parties the ins and outs of how to make decorative yet functional supports for plants. Rebar artist Lindsay Smith's whimsical work encourages others to use their imaginations, learning how to bend rebar into curlicues, spirals, figure eight's and other fun shapes.

These rebar shapes not only create support for plants without taking away their natural line and form, but also add winter interest as rusted sculptural shapes.

The seminar has an enrollment minimum of 15 people, so be sure to pre-register at (206) 842-7053.

What: Spring 2002 Garden Center Seminars and Events
Hooplah Rebar Garden Supports

When: Saturday, May 11
10:30 a.m. – 12:30 p.m.
