Course Outcomes / Objectives:

At the end of the quarter students will be able:

1. To identify and build on their own learning and cultural strengths.
2. To apply questioning and critical thinking skills to college reading, writing, and lectures, and to understand critical thinking as a skill to be continually developed.
3. To identify and develop a variety of strategies for academic success.
4. To identify college resources and learn how to access them successfully.

Explain the student demand for the course and potential enrollment:

Demand for the course varies by quarter, with fall quarter having the largest demand. Enrollments have been at 25 in the past, but more recent enrollments are in the 12-18 range. I teach this class as part of my 30 hour counseling load, so cancellation only occurs with extremely low numbers and is by instructor decision. I will be offering this class in a hybrid fashion for the first time in the fall 2014 quarter, and do not know the impact that this will have on course enrollment.

Explain why this course is being revised:

I believe there is opportunity to have student engagement and participation via supplemental themed readings and student reactions in an online environment, coupled with weekly in class experiential learning activities. The class will meet once weekly in either a 1.5 or 2 hour block, which allows for more time to dive deeper into subject matter. Students will continue their learning via a learning management system (LMS), such as Canvas, through additional readings and reflection. Students will also be oriented to the LMS through the course.

What challenges, if any, do you foresee in offering this course:

Challenges include those faculty typically see: students doing the bare minimums; procrastination. On my end, it will be developing activities that draw out and engage students in a largely independent online environment.
This is to certify that the above criteria have all been met and all statements are accurate to the best of my knowledge.
