LHO120 - Perennial Plant Identification

BASIC INFORMATION
Requester(s): Robert Glatt
Sarah Skamser
College: South Seattle Community College
Division/Dept: Professional Technical
Dean: Robert Glatt
Peer Reviewer(s): Van M Bobbitt
Aaron Burman
Steve Hilderbrand

COURSE INFORMATION
Proposed Course Number:
Prefix: LHO Number: 120
Request a new Prefix
This will be a common course

Full Title: Perennial Plant Identification
Abbreviated Title: Perennial Plant Id

Catalog Course Description:
Identify and properly use annual and perennial plants adapted to and utilized in Pacific Northwest landscapes. Field trips to established gardens. Recommended for Success: LHO 150.

Course Length: 11 Weeks
Request an Exception

Course Prerequisite(s):
None, Recommended for Success: LHO 150.

Course Corequisite(s):
None

Topical Outline:
I. Taxonomy and identification 11
II. Botanical nomenclature 9
III. Landscape usage 9
IV. Plant culture 9
V. Plant selection and use 6

Total 44

COURSE CODING

Funding Source: ..........................State
Institutional Intent: ......................Vocational Preparatory

This Course is a requirement for the following program(s):
(No Programs Selected)

☑ My Course Proposal is a requirement for a program not on this list
Program Title/Description/Notes:
One year LHO certificate (all Tracks), AAS, AAS-T

Will this course transfer to a 4-year university?  No
Is this course designed for Limited English Proficiency?  No
Is this course designed for Academic Disadvantaged?  No
Does this course have a Workplace Training component?  No

CIP Code: 01.0601  Request Specific CIP Code
EPC Code: 135  Request Specific EPC Code

Credits:
Will this course be offered as Variable Credit?  No

List Course Contact Hours
Lecture (11 Contact Hours : 1 Credit) 22
Lab (22 Contact Hours : 1 Credit) 22
Clinical Work (33 Contact Hours : 1 Credit) 0
Other (55 Contact Hours : 1 Credit) 0

Total Contact Hours 44
Total Credits 3

COLLEGE SUPPLEMENTAL

Proposed Quarter of Implementation:  Request Provisional Exception
Class Capacity: 25

Modes of Delivery: (Check all that apply)
✔ Fully On Campus
☐ Fully Online
☐ Hybrid
☐ Other  Explanation:

Class Schedule Description:
Identify and properly use plants adapted to, and utilized for annual and perennial plantings in the Pacific Northwest. Field trips to established gardens. Recommended for success; LHO 150 suggested.

Student Learning Outcomes:

**Communication**
Read and listen actively to learn and communicate

**Critical Thinking and Problem-Solving**
Think critically in evaluating information, solving problems, and making decisions
   Utilize both critical thinking and problem solving in evaluating information and making decisions regarding appropriate use of plant materials.

**Technology**
Select and use appropriate technological tools for academic and career tasks
   Understand how to research using computers and libraries.

**Personal Responsibility**
Uphold the highest standard of academic honesty and integrity

Respect the rights of others in the classroom, online and in all other school activities

Attend class regularly, complete assignments on time and effectively participate in classroom and online discussions, group work and other class-related projects and activities
   Be motivated and able to continue learning beyond coursework. Also take pride in one's plant knowledge and ability to utilize it for plant identification and selection.

Abide by appropriate safety rules in laboratories, shops and classroom

**Information Literacy**
Independently access, evaluate and select information from a variety of appropriate sources
   Access and evaluate plant information from a variety of sources.

Use information effectively and ethically for a specific purpose

</tr>
</tbody>
</table>

Course Outcomes / Objectives:
1. Identify approximately 140 plants commonly used as perennials in or adapted to Pacific Northwest landscapes.
2. Describe the growth habits, cultural requirements, ecological relationships, major pest and cultural problems, and appropriate landscape uses of the plant materials studied.
3. Recommend appropriate plants (from those covered in the course) when given specific landscape situations with varying cultural, aesthetic, and physical requirements.
4. Demonstrate an understanding of the factors involved in suitable plant selection for the sustainability and economic viability of a landscape.
5. Recall the common and scientific names of the plants studied.
This fills out the plant palette utilized in the industry.

Explain why this course is being revised:
Updating course outline information as it will be taught.

What challenges, if any, do you foresee in offering this course:
None.
This is to certify that the above criteria have all been met and all statements are accurate to the best of my knowledge.
