Class Schedule Description:
Covers sustainable maintenance practices, lawn management, tool and small equipment use, safety, landscape management plans, and the impact of design on maintenance requirements.

Student Learning Outcomes:
Communication
Speak and write effectively for academic and career purposes
   Actively participate in class discussions, exercises, and labs.

Computation
Use arithmetic and other basic mathematical operations as required by program of study
   Use basic mathematical operations to calculate areas, fertilizer usage, pesticide-application rates, soil-amendment requirements, and costs.

Critical Thinking and Problem-Solving
Think critically in evaluating information, solving problems, and making decisions
   Think critically in evaluating information, solving problems and making decisions related to landscape-management operations.

Technology
Select and use appropriate technological tools for academic and career tasks
   Select and use appropriate tools for landscape-management tasks.

Personal Responsibility
Attend class regularly, complete assignments on time and effectively participate in classroom and online discussions, group work and other class-related projects and activities
   Attend all classes and complete all assignments on time.

   Abide by appropriate safety rules in laboratories, shops and classroom
   Practice safety at all times, especially in the operation of small equipment and the use of hand tools.

Information Literacy
Independently access, evaluate and select information from a variety of appropriate sources
   Access and evaluate information from a wide variety of sourcesâ€”landscape trade publications, industry web sites, academic web sites and booksâ€”to keep current with landscape-management practices and the state of the landscape industry.

Course Outcomes / Objectives:
1. Describe and apply best management practices for lawn-management and sustainable landscape maintenance appropriate for the Pacific Northwest.
2. Calculate fertilizer rates, pesticide application rates, and soil amendment requirements for specific areas.
3. Develop a landscape-management plan for an assigned landscape area.
4. Evaluate the maintenance requirements for a landscape and suggest methods for reducing maintenance through improved design.
5. Discuss sustainability issues that affect the landscape-management industry and be able to articulate various points of view on these issues.
6. Use several professional reference materials (books, periodicals, academic and industry websites) to gain further information about landscape management issues and practices.
7. Practice safe and effective use of hand tools and small equipment.
8. Demonstrate understanding of safety concerns and how to minimize risks through proper work practices and the use of safety protection equipment.

Explain the student demand for the course and potential enrollment:
Class is currently offered once a year, not a new course.
Explain why this course is being revised:
   This is not a new course, it is updating the outline of an existing course.

What challenges, if any, do you foresee in offering this course:
   None.
This is to certify that the above criteria have all been met and all statements are accurate to the best of my knowledge.
