Student Learning Outcomes:

Communication
Read and listen actively to learn and communicate
Read and listen actively to learn and communicate with clients, supervisors, employees and colleagues.

Speak and write effectively for academic and career purposes
Speak and write effectively for academic and career purposes.

Human Relations
Use social interactive skills to work in groups effectively
Use social interactive skills to work in groups effectively.

Critical Thinking and Problem-Solving
Think critically in evaluating information, solving problems, and making decisions
Think critically in evaluating information, solving problems and making decisions throughout the process.

Technology
Select and use appropriate technological tools for academic and career tasks
Select and use appropriate tools for safe and efficient completion of the work.

Personal Responsibility
Attend class regularly, complete assignments on time and effectively participate in classroom and online discussions, group work and other class-related projects and activities
Be motivated and able to continue learning and adapt to change. Value one’s own skills, abilities, ideas and art. Complete the project to a standard demonstrating pride in one’s work.

### Course Outcomes / Objectives:

1. Define permaculture, discuss its historical roots, and describe permaculture applications.
2. Describe the concepts of ecology and ecosystems as applied in permaculture.
3. Demonstrate how patterns and whole systems models of permaculture apply to landscape and garden plantings.
4. Recognize the roles of plants, organisms, soil, and water in the “loop” of permaculture.
5. Assess a permaculture model through a site visit.
6. Identify the planning involved in the design of a permaculture site.
7. Demonstrate comprehension of leadership quality and safety standards of the landscape...
horticulture industry, as well as environmental, ethical and legal standards and issues.

Explain the student demand for the course and potential enrollment:
Permaculture is a hot topic, with many people interested in understanding the concepts and methods. This is a required course for the core curriculum.

Explain why this course is being revised:
The revised course description is more applicable to how the course is taught and information utilized by students.

What challenges, if any, do you foresee in offering this course:
None at this time. It puts a new name to some topics presented in past courses. This also introduces concepts and methods new to many people.
This is to certify that the above criteria have all been met and all statements are accurate to the best of my knowledge.
