COURSE DESCRIPTION:

The course will explain basic economic terms and concepts, before surveying various nations and regions politically and economically. The course then turns to discuss how these nations and regions economically compete with and/or assist one another. This course will investigate the following: human and non-human resources, the international monetary system, government business activity, development, and international law. Certainly the course will consider popular topics like NAFTA, the United Nations, and differences in world income.
STUDENT LEARNING OUTCOMES ADDRESSED:

1. Communication - Read and listen actively to learn and communicate. Speak and write effectively for personal, academic and career purposes.
2. Human Relations - Use social interactive skills to work in groups effectively. Recognize the diversity of cultural influences and values.
3. Critical Thinking and Problem Solving - Think critically in evaluating information, solving problems and making decisions.
4. Technology - Select and use appropriate technological tools for personal, academic and career tasks.
5. Personal Responsibility - Be motivated and able to continue learning and adapt to change. Value one’s own skills, abilities, ideas and art. Take pride in one’s work. Be aware of civic and environmental issues.
6. Information Literacy - Access and evaluate information from a variety of sources and contexts, including technology. Use information to achieve personal, academic, and career goals, as well as to participate in a democratic society.

GENERAL COURSE OBJECTIVES:

The study of politics and economics is usually divided into two separate disciplines, two separate departments even. In the real world, the politics and economics are inter-related and often mutually serving. A society’s economics are so important that its politics tend to serve that society’s economic interests. I hope that through this course you enhance your understanding of this relationship, why it is increasingly important, and where it can go awry. Such a course achieves its tangential goals if students leave with a greater appreciation for structures like capitalism on the one hand, and concerns like a fairer distribution of the wealth on the other.
