To fix the issue regarding "Secure Certificate Authority – G2", please follow the screen shots for setting up Apple-Mac to access South’s Citrix application.

Step 1 –

Step 2 – Open Safari and follow RED arrows
Note: After Click and Drag the “Go Daddy Secure…” to your desktop. All open windows should be closed

Step 3 – Open KeyChains
Keychain Access is trying to modify the system keychain.
Enter your password to allow this.

User Name: ITservices [yourname]
Password: [your password]

This process is importing secure certificate to your MAC os system. You must do this to be able to access South's Citrix application.
Step 4 – Re-open you Safari and Go to https://citrix.southseattle.edu

You should be able to access all applications
