

Today's Training for Tomorrow's Career!

BECOME PART OF WASHINGTON'S STRONG AVIATION INDUSTRY

Whether it's the first or 400th take-off, every aircraft must have permission from an FAA-certified aviation maintenance technician before it can take to the skies. As a result, Airframe and Powerplant Mechanic's FAA licenses are among the most highly regarded, sought after credentials in the aviation industry.

Get the credentials you need with South Seattle College's Aviation Maintenance Technology program, where we prepare you for success by employing hands-on training with real aircraft and engines, taught by experienced faculty.

This program prepares you to:

- Keep airplanes in a safe condition to fly
- Perform production installations
- Maintain and alter aircraft structures, systems and sub-systems
- Service, repair and overhaul aircraft components and systems—airframes, engines, electrical, hydraulic systems and propellers

"I was lucky to be educated by great instructors who have been in the industry for well over 30 years. I came with a dream, and South's efforts helped me realize that dream."

~ Samson Assegahegn

PICK YOUR PATH: AREAS OF STUDY

South's Aviation Maintenance Technology program, one of the largest, most experienced FAA-approved programs in Washington state, offers both degree and certificate options to fit your career interests. Our program provides you with the knowledge and practical skills required to take the FAA-licensing examinations.

- **Associate of Applied Science (A.A.S.) in Aeronautical Technology**
- **Associate of Applied Science Transfer (A.A.S.-T) in Aeronautical Technology**
- **Already Have Experience Repairing Aircraft?**
You may qualify for an accelerated certificate program specifically designed for transitioning and former armed service members.

START HERE, GO ANYWHERE!

Demand for Aviation Maintenance Technology positions is expected to skyrocket over the next 20 years. In King County, the median wage for FAA-licensed technicians in 2017 is \$70,036. Join an industry that offers flexible, good-paying jobs that double as a springboard to other aviation careers.

Graduates of the Aviation Maintenance Technology program have gone on to careers with industry leaders, including:

- Delta Airlines
- Alaska Airlines
- Horizon Airlines
- Columbia Helicopter
- Boeing
- Aviation Technical Services

To help you get the career you want, the Aviation Maintenance Technology program has a Career Navigator dedicated to providing assistance with:

- Industry-specific resumes
- Interview techniques
- Industry connections
- Career planning and internships
