Students construct a single class project that incorporates work into a unified visual statement. Instructor exposes students to works of art from a diverse range of cultures through lecture, prints and slides. Students study the language of art and the function of art works in diverse cultures.

3. Critical Thinking and Problem Solving - Think critically in evaluating information, solving problems and making decisions.

Each assignment is presented as a problem that the students will need to solve using course skills and knowledge. The creative process involves constant decision making based on experience and reevaluation based on project goals.

4. Personal Responsibility - Be motivated and able to continue learning and adapt to change. Value one's own skills, abilities, ideas and art. Take pride in one's work. Manage personal health and safety.
